WC: 3

Área Terreno: -

€

SUSTAINABLE CONSTRUCTION. What is it about? "SUSTAINABILITY" is, nowadays, part of the concerns of civil society, environmental associations, and governments, on a global scale. Given the pressure and urgency we are experiencing due to climate change, scarcity of natural resources and commitment to renewable energy solutions, the need for innovation and the search for technical solutions and new materials in the construction sector has become a reality with the creation of the concept of "SUSTAINABLE CONSTRUCTION". "SUSTAINABLE CONSTRUCTION" is therefore a concept for construction that takes into account the design, construction and maintenance of buildings, using innovative materials, technology, efficient processes and resource optimization.
